

Wynsoft™ Guardian

Wynsoft™ Guardian is an innovative product that makes proactive remote monitoring of warehouse control systems a reality. This module works seamlessly with our control systems to enhance the flow of time-sensitive information across your enterprise.

Our detection software monitors critical items such as computer performance, host communication, safety devices and the status of common system faults. Guardian generates e-mail notifications to both your staff and our support center team when a system alert is detected, providing increased productivity for our customers. The Guardian Module also supports Wynright's optional web-based camera monitoring system.

Our Web application is both full featured and intuitive. Information vital to your operation and processes can be accessed with a simple mouse click.

Useful Statistics

- Scanner statistics
- Sortation statistics
- Max/Min carton length
- Full line occurrence counts

- Detail carton and alert history
- Zone activity
- System information

Web Based

Securely login via the internet from anywhere in the world

Alerts and Real-time Monitoring

See the health of the entire system in one glance via the connection tab

Our Guardian Module features:

- Intuitive dashboard technology
- Real time statistics and information
- Graphics and alerts (optional)
- Enhanced troubleshooting diagnostics
- Data/trend analysis

Standard and customized reports provide detailed system health diagnostics. Maintenance and IT staff can quickly identify problem areas and significantly reduce down time. Don't spend critical time looking for the problem...check with Guardian and get your operation back up and running in minutes not hours.
