

Wynsoft™ Transporter

Interacting in harmony with PLC functions, the Transporter Module contains the movement and tracking algorithms to efficiently move product through your facility for receiving, shipping, replenishment and quality assurance activities. In short, the Transporter Module ensures product gets moved from where it is to where it needs to be in the most effective manner possible.

In addition to controlling the movement of product, the Transporter Module also records milestones of movement and provides the archival of data for subsequent examination and interrogation by the Wynsoft™ Visibility Module.

Solutions

- Crane management
- Inventory control
- Intuitive graphics
- Integrated WMS interface

Graphics and Alerts

- Real time graphics
- Area status
- Statistics
- System health diagnostics
- Queued data view

User Friendly

- Intuitive design
- Familiar windows interface
- 'Click and Go' navigation
- Reduced training time

Our Transporter Module features:

- Fully Integrated Interfaces to WMS and AS/RS Sub-System
- Intuitive Inventory Management of all loads in the storage system (AS/RS, Miniload, Shuttle, Robot, AGV, LGV)
- Algorithms for the routing of product loads into and out of locations within the AS/RS system
- Seamless routing of product loads on surrounding conveyor systems
- Interface to WMS

Our simple and intuitive Visibility Module gives users a 'window of intelligence' touching on all major areas of the system including statistics, system health, parcel updates, crane availability, queue lines and much more.
